This publication is a listing of the winter survival, fall dormancy and pest resistance ratings of alfalfa varieties eligible for certification by seed certifying agencies. This publication does not list all important characteristics which should be considered carefully in the selection of alfalfa varieties. With the exception of some varieties listed as checks, all varieties listed can be purchased in the United States.

Varieties are submitted for listing by marketers and listing does not imply endorsement by the National Alfalfa Alliance. The variety information in this publication is that submitted for certification. The varieties listed by “Public” under the “Contact for Marketing Information” column are sold by many marketers. The remainder are “Proprietary Varieties,” which are sold by the specific marketers listed. Addresses of current marketers have been supplied by the developers and/or marketers.

This National Alfalfa Alliance publication is intended for use by Extension and agri-business personnel to satisfy a need for information on characteristics of certified-eligible alfalfa varieties. The Alliance updates this publication annually to keep the information current.
## Winter Survival, Fall Dormancy & Pest Resistance Ratings for Alfalfa Varieties

Information obtained from the Association of Official Seed Certifying Agencies (AOSCA), and the National Alfalfa Variety Review Board (NAVRB) Report. Blank spaces indicate variety is susceptible or has not been adequately tested.

### Resistance Ratings

<table>
<thead>
<tr>
<th>% Resistant Plants</th>
